

BLAST CHILLER

Congeals for **Freshness**

Prego Blast Chiller makes life simple!

About Prego Blast Chiller

Blast Chilling is the method of rapidly cooling down of freshly prepared food to a low temperature. (+70° to +3° / -18°), so that it is relatively safe from bacterial growth. Thus food is rendered for consumption as and when required.

Advantages

Accelerated cooling

Ideal moisture control

Extended preservation period

Convenient to cook immediately

Seamless production efficiency due to extended storage

Prevents food wastage

Rules out process repetition

Keeps freshness intact

What is Vacuum packing?

Vacuum packing is the process of removing air around a food product and then sealing that product in an impermeable package.

Main features of Prego Vacuum packing are:

- Protects food from the air, preventing oxidation
- Preserves taste, moisture and texture
- Store pre-prepared foods and ingredients under vacuum for days, weeks or even months.

Vacuum Packing Machine

Model No	: BVM350
Dimension	: 540 x 490 x 450 mm
Chamber Dimension	: 430*370*190 mm
Hot weld sealer	: 350 mm
Vacuum pum	: 8 m ³ /h (meter cube)
Voltage	: 230 V/50 Hz
Power	: 0.9 Kw
